CORONA VIRUS CORRELATES TO COSMIC RAY SPIKES
From China to Sri Lanka to Moscow. SEPT 2019. Overwhelming evidence. Authors have declared that no competing interests exist. There were 273 spotless days in 2019 and no sunspots for 40 days from

November 14 to December 23, 2019. On December 31, 2019, a cluster of pneumonia of unknown etiology was reported in Wuhan City, Hubei Province of China. Although the outbreak of pneumonia was determined to be caused by the 2019 Novel Coronavirus (COVID-19), the true cause of its sudden emergence is unclear. ybjnm.ihep.ac.cn/munn/ ncbi.nlm.nih.gov/pmc/articles/PMC7529058/

TYPICAL SUNSPOT COUNTS (MONTHLY)

wwwbis.sidc.be/silso/dayssnplot 1975 to 2020

On average the Sun holds 50 to 100 sunspots per month depending on who is counting. During Covid, fires and floods, patterns change. If trends persist, we could enter a dark age last seen in the 16th c.

Calendar Years (Christian Era)

The absence of sunspots, does it correlate with intellectual disability and a drop in “non institutional” literature?

Paleo Tide and Stratigraphy struggle with circular logic problems. It is inherently a challenged science.

MOON TO EARTH DISTANCE, SUN TO EARTH DISTANCE

opentextbc.ca/astronomyopenstax/chapter/the-global-perspective/ The Earth and its atmosphere against the Sun's solar wind magnetic pressure in image left. Somedays you might see the moon close in the evening sky and far in the morning sky.

The Sun is sometimes close in the sky and farther away, the next day. Refracting light is deformed in concaving spherical atmospheres. Helium3 (3H) is found in solar wind.

ILLUMINATED TYPE AND THE “CBGB’s” RULE

A drop cap (dropped capital) during typographic copies from old books to new papers was required in history when printing presses were not available. The G's and B's were sometimes interpreted as C's.

Solar plasma wind, "whirls" twisted pair Birkeland currents to the north and south poles. Ionized hydrogen (electrons and protons), 8% helium (alpha particles) and atomic nuclei: C (Ca), N (Nitrogen), O (Oxygen), Ne (Neon), Mg (Magnesium), Si (silicone), S (Sulfer), and Fe (Iron) ripped from active area sunspot corona (Feldman et al., 1998). Active regions are tracked on magnetogram doppler (MDI). Historically it was best monitored in the H-alpha wavelength and occurs in the chromosphere, though occasionally white light flares are seen in the photosphere. PLANTS : PLASMA : PLASTIC : PLASTER : PLATNIUM

Aurora Borealis and noctiluculent clouds. Hydrogen magnetics combine with Oxygen's electrics. Ozone and H2O. Most moon planets rain something. The Earth is twice the size it was +300M years ago. North and South poles extend to birkland twisted pair sils leading straight to the Sun.

Lightning to Trees. Blood plasma is similar to Maple Syrup. Jolt! Fizz! Aging...

AURORA OVALS TOWARDS SUDBURY ONTARIO

Does it have anything to do with the London Fog?

FOURTH OF JULY WEEKEND SAW HIGHEST NUMBER OF MASS SHOOTING THAN ANY OTHER WEEKEND IN 2021

ANCIENT WEREWOLVES AND LUNAR MAGNETIC EVENTS WERE REAL!
SOLAR MAGNETIC MADNESS HAPPENS AS DOES ANY DISEASE!

Selenium supplementation in the prevention of coronavirus infections (COVID-19) : ENZYATIC SCAVENGING OR SILK CONDUIT?

Selenium (Se) is a ubiquitous element akin to sulfur (S). Low Se is associated with increased incidence of cancer and heart diseases. Cofactor in glutathione peroxidase. Anti Viral.

Inhibited the development of polio and influenza virus. Brazil nuts, seafoods, and organ meats are the richest food sources of selenium. ncbi.nlm.nih.gov/pmc/articles/PMC7246001/

SelenoMethionine and SelenoCysteine Hydrogen and Oxygen scavenging methionine is a sulphur essential amino acid recycled in methylation pathways. Cysteine non essential amino acid helps collagen and keratin. Selenium is a trace nutrient that may show deficient signs as aluminum toxicatation. Selenium may detox aluminium. Poly Ethylene Glycol PEG (onions, coconuts) and Polysorbate are in the mRNA and J&J/Janssen vaccine. Sorbet^(ENGLISH) sorbeto^(ITALIAN), which in turn comes from serbet^(TURK) transliteration of the Iranian sharbāt^(IRANIAN), referring to the same type of beverage.
